

Practitioner Register Committee – Definitions for Members of the Public

The Structure of the JCCP Practitioner Register

The JCCP operates a register of practitioners who perform non-surgical cosmetic procedures and hair restoration surgery, such as dermal fillers, injectable toxins, laser treatments, hair restoration surgery and skin rejuvenation – peels and micro needling and who meet their specified standards to practise safely. This register is separated into two parts:

- **'Part A'** of the Register is [for designated healthcare professionals](#) who are registered clinicians and who are also registered with a government regulator such as the General Medical Council, The General Dental Council or the Nursing and Midwifery Council, The General Pharmaceutical Council or with the Health Care Professions Council. The professional title/designation of the persons whom we register on this part of the Register will be listed – e.g. Doctor, Dentist, Nurse, Pharmacist, Physiotherapist etc. In addition to meeting the requirements set down by the JCCP to join the Register, registered health care professionals are required also to meet the strict requirements of their professional governing bodies to confirm that their practice is up to date on an annual basis. This provides members of the public with additional assurance that registered health care professionals are considered to be safe and competent to practise and are held accountable for their practice by their professional regulator e.g. the GMC etc.
- **'Part B'** of the Register is for all other 'Aesthetic Practitioners', who are not regulated by a government health care professional regulator. Practitioners who are included in this part of the Register may be Beauty Therapists etc.

'Part A' and **'Part B'** of the JCCP Practitioner Register are sub-divided into **two** parts – 'Full Registration' and 'Provisional Registration'. The JCCP Register lists each Registrant under specific categories which are defined below.

Definitions

'Part 'A' - Full Registration

Part 'A' of the Practitioner Register is divided in two **'Categories'**:

Category One

These are practitioners registered on **Part 'A'** of the JCCP's 'Full Register' and who have been described as being **'Full – Category One'** against their name/record. These practitioners have satisfied the JCCP that they have met **all** of the conditions set down by the JCCP for entry to its Register at the point of application for the specific procedure/level of treatment for which they are seeking registration (including meeting required education and training standards).

Category Two (Applies to Part 'A' of the Register only) – Described on the Practitioner Register as 'Full – Category Two'

These are practitioners registered on **Part 'A'** of the JCCP's 'Full Register' and who have been described as being **'Full – Category Two'** against their name/record. Registrants who are registered under this category will not yet have been assessed by the JCCP as having met the Council's full educational qualification standards for aesthetic practice. However the Registrants who are registered under this category will have satisfied the Council that they are safe to practise as confirmed by their current registration with their relevant professional statutory regulatory body (e.g. the General Medical Council; The General Dental Council; The Nursing and Midwifery Council; The Health Care Professions Council and the General Pharmaceutical Council). Such practitioners must also confirm that they have been practising in their declared area of practice and at the appropriate level of practice for a minimum of one year and have provided sufficient self-declared evidence that they meet the JCCP's standards and competence requirements to be considered by the JCCP to be safe to practice in each, or all of the procedures/levels for which they are seeking registration.

It should be noted that the UK Government is currently designing a new licensing scheme for non-surgical cosmetic practitioners in England. The JCCP will require all Part 'A' – 'Category One' and Category Two' Registrants to provide evidence that they will meet all future education and training requirements that might be determined by the UK Government (and/or by the Devolved Authorities in Scotland, Wales and Northern Ireland) in accordance with the timescale set for the achievement of the same.

***'Provisional Registration'* – Annotated on the Practitioner Register as **'Provisional'**.**

Provisional registration is applied to those registrants on Part **'A'** of the JCCP register who have provided sufficient self-declared information to satisfy the Council that they have committed to work in accordance with the CPSA practice standards and with the JCCP/CPSA Code of Practice for each, or all of the procedures/levels for which they are provisionally registered. Such registrants have yet to acquire either the required level of practice experience and/or evidence of qualifications required to confirm that they can enter the Register unconditionally. Provisional registrants must self-declare that they are working towards achieving the required experience, knowledge and training as defined within the CPSA Standards and JCCP standards and where required must confirm that they are currently undertaking appropriate professional and educational development to enable them to demonstrate achievement of requisite JCCP competencies for their respective procedural area of practice/level.

All provisional registrants must meet the same general entry requirements set for all JCCP registrants and will not be permitted to progress to the next level of their JCCP procedure-specific registration until their admission to the Full Register is approved.

***'Part 'B'* - Full Registration**

These are non-registered health-care practitioners (e.g. Beauty Therapists) who have satisfied the JCCP that they have met **all** of the conditions set down by the JCCP for entry to its Register at the point of application for the specific procedure/level of treatment for which they are seeking registration (including meeting required education and training standards).

It should be noted that the UK Government is currently designing a new licensing scheme for non-surgical cosmetic practitioners in England. The JCCP will require all Part 'B' – Registrants to provide evidence that they will meet all future education and training requirements that might be determined by the UK Government (and/or by the Devolved Authorities in Scotland, Wales and Northern Ireland) in accordance with the timescale set for the achievement of the same.

***'Provisional Registration'* – Annotated on the Practitioner Register as **'Provisional'**.**

Provisional registration is applied to those registrants on Part **'B'** of the JCCP register who have provided sufficient self-declared information to satisfy the Council that they have committed to work in accordance with the CPSA practice standards and with the JCCP/CPSA Code of Practice for each, or all of the procedures/levels for which they are provisionally registered. Such registrants have yet to acquire either the required level of practice experience and/or evidence of qualifications required to confirm that they can enter the Register unconditionally. Provisional registrants must self-declare that they are working towards achieving the required experience, knowledge and training as defined within the CPSA Standards and JCCP standards and where required must confirm that they are currently undertaking appropriate professional and educational development to enable them to demonstrate achievement of requisite JCCP competencies for their respective procedural area of practice/level.

All provisional registrants must meet the same general entry requirements set for all JCCP registrants and will not be permitted to progress to the next level of their JCCP procedure-specific registration until their admission to the Full Register is approved.

General Admission Requirements for all Registrants on the JCCP Practitioner Register (Parts 'A' and 'B').

All Registrants who are registered 'Fully' or 'Provisionally' on either part of the JCCP Register will be required to fulfil the following generic admission requirements:

- Self-declare that they practise lawfully.
- Self-declare that they are of good character and declare any police convictions or cautions etc. or any employment-related disciplinary matters that are current at the time of their application.
- Escalate **any** fitness to practice or professional conduct issues to the JCCP as soon as the Registrant becomes aware of any challenge to their practice.
- Self-declare that they practise in accordance with the JCCP and CPSA supervision requirements and in accordance with the JCCP/CPSA Code of Practice.
- Confirm that they operate from safe premises and self-declare against a checklist of premises standards.
- Declare that they will operate and practise only within their self-declared scope of practice with regard to the treatments and level of practice that they are recorded as having achieved (i.e. as displayed on the JCCP Register).
- Provide evidence that they have an appropriate level of insurance/indemnity (certificates will be inspected by the JCCP Registration Team prior to acceptance onto the JCCP register).
- Confirm that they possess the experience, knowledge, skills and confidence to practise safely and proficiently within the procedural area/s of practice/level for which they are registered with the JCCP.
- Provide evidence of their statutory healthcare regulated PIN Number (for designated health care professionals only on **Part A** of the Practitioner Register e.g. 'Doctor – GMC Registration/PIN Number').
- Provide evidence of the training that the practitioner has undertaken with specific reference to the aesthetic treatment/level for which they are seeking registration.

Qualification levels

The JCCP has published a matrix of qualification standards and levels required for cosmetic practice. These standards and levels have been adopted by the JCCP as foundation principals to inform the JCCP 2018 Competency Frameworks (as described in the HEE guidelines on education and training standards in the sector in 2015).

The majority of registered healthcare practitioners who appear on Part A of the JCCP Practitioner Register are awarded a Level 6 qualification at the point of entry to their professional register. It should be noted that some practitioners qualified prior to the implementation of national Level 6 qualifications and as such, are cited on the JCCP Practitioner register Category 2 as having a Level 5 initial qualification. Such practitioners are recognised by their professional statutory regulator as having equivalence to a Level 6 qualification.

Explanation of Registration Status on Published on the JCCP Website

Definition of Occupation and Status

Part A – ‘Professional Health Care Practitioner’ – ‘Designation’ to be Cited – For example Designated Healthcare Professional (DOCTOR), Designated Healthcare Professional (NURSE) etc.

Part B – ‘Non- Healthcare Practitioner’ – e.g. Beauty Therapist

The JCCP Register has also developed a graphical representation of the status of its registrants (see Appendix 1).
