

JCCP Practitioner Register Committee

Definitions for Members of the Public

The Structure of the Practitioner Register

The JCCP operates a register of practitioners who perform non-surgical cosmetic procedures and hair restoration surgery, such as dermal fillers, injectable toxins, laser treatments, hair restoration surgery and skin rejuvenation – peels and micro needling.

This register is separated into two equal parts:

- **'Part A'**, is for [designated healthcare professionals](#) who are registered clinicians and who are also registered with a government regulator such as the General Medical Council, The General Dental Council or the Nursing and Midwifery Council, The General Pharmaceutical Council or with the Health Care Professions Council. The professional title/designation of the persons whom we register on this part of the Register will be listed – e.g. Doctor.
- **'Part B'**, is for all other 'Aesthetic Practitioners', who are not regulated by a government regulator. Practitioners who are included in this part of the Register may be Beauty Therapists etc.

It should be noted that the UK and Scottish Governments are currently designing a **new licensing/regulatory scheme** for non-surgical cosmetic practitioners in England and Scotland. An integral component of these new Government regulatory schemes will be the setting of new practice competencies and associated education and training standards for all registrable non-surgical procedures. These delayed standards are now expected to be published in 2026/2027. From that time the JCCP will require all Part 'A' – 'Category One' and Category Two' and all Part B Registrants to provide evidence that they will **meet all future competence, education and training requirements** that might be determined by the UK and Scottish Governments (and/or by the other UK Devolved Authorities in, Wales and Northern Ireland) in accordance with the timescale set for the achievement of the same. Until the new standards are published and accessible to practitioners the JCCP has suspended the need for JCCP Practitioner Registrants to meet any previously set timeframes for its Part A - Category 2 and Part B Registrants to meet current JCCP time period restrictions to progress from the JCCP's Provisional Registration Category to its 'Full' registration category and for its Part A – Category 2 Registrants to progress to Category 1.

Definitions

‘Full Registration’

Full registration is achieved when the Registrant (on either Part ‘A’ or Part ‘B’ of the register) meets one of the following two ‘Conditions’ which are defined in the following Categories of registration (either of these conditions must be met in full for the Registrant to be afforded ‘Full Registration’ status):

Category One – Annotated on the Practitioner Register as ‘Full – Category One’

These are practitioners registered on either **Parts ‘A’ and ‘B’** of the JCCP’s ‘Full Register’ and who have the annotation ‘Full – Category One’ against their name/record. These practitioners have satisfied the JCCP that they have met all of the conditions set down by the JCCP for entry to its Register at the point of application for the specific procedure/level of treatment for which they are seeking registration.

Category Two – Annotated on the Practitioner Register as ‘Full – Category Two’

This condition applies **only** to Registrants on **‘Part A’** of the JCCP Register who have demonstrated that they are currently registered with a designated healthcare Professional Statutory Regulatory Body as defined above (and are therefore considered to have met the conditions set down for entry and continuing practice to, and with that profession) that oversees one of the JCCP’s approved/designated healthcare professions (for [designated healthcare professionals](#)). Such practitioners must also confirm that they have been practising in their declared procedural area of practice/level for a minimum of two years and have provided sufficient self-declared evidence that they meet the JCCP’s core and procedure-specific competencies to be considered by the Council to be fit for practice in each, or all of the procedures/levels for which they are seeking registration (see the list cited below). Such persons must also confirm that they have undertaken the minimum number of procedures/case numbers set down for their specific modality/procedure area as specified within the CPSA Practice Standards (February, 2018).

Full registration is applied under two ‘Conditions’ (either of these conditions must be met in full for the registrant to be afforded ‘Full Registration’ status):

‘Provisional Registration’ – Annotated on the Practitioner Register as ‘Provisional’.

Provisional registration is applied to those registrants on both Part ‘A’ and ‘B’ of the JCCP register who have provided sufficient self-declared information to satisfy the Council that they have committed to work in accordance with the CPSA practice standards and with the JCCP/CPSA Code of Practice for each, or all of the procedures/levels for which they are provisionally registered. Such registrants have yet to acquire either the required level of experience and/or evidence of qualifications required to confirm that they can enter the Register unconditionally. Provisional registrants must self-declare that they are working towards achieving the required experience as

defined within the CPSA Standards and JCCP standards and where required that are currently undertaking appropriate professional and educational development to enable them to demonstrate achievement of requisite JCCP competencies for their respective procedural area of practice/level.

All provisional registrants must meet the same general entry requirements set for all JCCP registrants and will not be permitted to progress to the next level of their JCCP modality-specific registration until their admission to the Full Register is approved.

General Admission Requirements for all Registrants on the JCCP Practitioner Register (Parts 'A' and 'B').

All Registrants who are registered 'Fully' or 'Provisionally' on either part of the JCCP Register will be required to fulfil the following generic admission requirements:

- Self-declare that they practise lawfully.
- Self-declare that they are of good character and declare any police convictions or cautions etc. or any employment-related disciplinary matters that are current at the time of their application.
- Self-declare that they practise in accordance with the JCCP and CPSA supervision requirements and in accordance with the JCCP/CPSA Code of Practice.
- Confirm that they operate from safe premises and self-declare against a checklist of premises standards.
- Declare that they will operate and practise only within their self-declared scope of practice with regard to the treatments modality and level of practice that they are recorded as having achieved (i.e. as displayed on the JCCP Register).
- Provide evidence that they have an appropriate and proportionate level of insurance/indemnity (certificates will be inspected by the JCCP Registration Team prior to acceptance onto the JCCP register).
- Confirm that they possess the experience, knowledge, skills and confidence to practise safely and proficiently within the procedural area/s of practice/level for which they are registered with the JCCP.
- Provide evidence of their statutory healthcare regulated PIN Number (for designated health care professionals only on Part A of the Practitioner Register e.g. 'Doctor – GMC Registration/PIN Number').
- Provide evidence of the training that the practitioner has undertaken with specific reference to the aesthetic treatment/level for which they are seeking registration.

Definition of occupation and status

Part A – 'Professional Health Care Practitioner' – 'Designation' to be Cited (if appropriate – Part A only) – For example Designated Healthcare Professional (DOCTOR), Designated Healthcare Professional (NURSE)

Part B – 'Non- Healthcare Practitioner'
